---

Dear Hiring Manager,

I am writing to express my interest in IT openings within your institution. As a recent MSc graduate with average of 78% pass rate in Information Technology from Eastern Mediterranean University, I am excited to apply my skills and support to growing technology industry. During my studies and hands-on experience, I have built a strong groundwork in systems administration, networking (CCNA7 certified), data science, and web development.

My research (thesis) dedicated on the future of eSIM technology, where I executed data analysis, statistical modelling, and machine learning using Python, SQL, and visualization tools like Power BI and Tableau. This hands-on project pushed my skill to work with complicated data to bring actionable learnings.

Adding to my academic foundation, I have hands-on experience from my time as a University Network Assistant and internship at Mello Attorneys where I led network configurations, troubleshooting, and system support. These positions helped me develop not only technical competence but also strong problem-solving, communication, and teamwork skills — qualities that I believe are crucial in today's fast-paced IT workplace. I am passionate about the opportunity to grow formally while adding value to your company. I am confident that my integration of technical knowledge, practical experience, and drive to learn will make me a strong benefit to your team.

Thank you for considering my application.

Kind regards,  
Mello Nkoana Collins
